L. SHERMAN TOWNSEND, Mgr.

SALISBURY, MARYLAND
World's Largest Growers and Shippers of Strawberry Plants
Dear Friends,

Since the inception of this firm, it has been our particular policy to "Make Every Customer A Personal Friend." In keeping with this, we have, in all of our dealings, striven to give sincere and courteous attention along with fair dealing business methods. We are deeply gratified in the result of this long standing policy. Your continued patronage and the sensational rise in sales over the past year, was reflected into what was the most successful year that we have ever experienced in the nursery business. Due to increased demands for thousands upon thousands of additional Townsend Select Strain plants, our organization has grown to such an extent that now, more than ever before, it is possible for us to give you the prompt service that you have a right to expect.

We have never endeavored to high pressure a prospective customer. Our way of establishing good will and making new Townsend Satisfied Customers is straight forward and simple. We ask only that you give us a trial order. Our confidence in our Select Strain stock is such that we are content to allow the plants to sell themselves. Those who have purchased our products in the past are already familiar with the larger yields "at no extra cost" made possible through Townsend products.

Sparing neither effort nor expense, we have taken advantage of the ideal weather conditions that prevailed this year with regard to the production of berry plants. The results have been to say the least, more than gratifying. Literally millions of high quality, vitality packed Townsend berry plants with the rugged and heavy fibrous root system that our customers are used to receiving, have been produced this year. Our list of varieties is up to date too, and we offer only the tried and proven varieties that come up to the quicker growing, heavier yielding Townsend standards... other we discard.

It is true that our production costs have risen along with everything else these days, but by increased production, greater volume of sales and never, scientifically planned method of growing, have managed to keep our prices on as low a level as last year. And, of course, every item listed in this catalog bears the Townsend "Money Back if Not Satisfied" guarantee. We can assure you that it is a pleasure for us to service you regardless of size or frequency of orders.

Thank you for your business, and we trust that we may have the pleasure of serving you this season.

Sincerely yours,

TOWNSEND NURSERIES

Cash in on Townsend's Select Strain plants... - - - your guide to profits

Now, as never before, the opportunity of planting "paying crops" is yours for the ordering. Get your share of bumper crops realized through Townsend Select Strain plants. Phenomenal yields... crate filling packings... will make those dollars roll in. And, of course, with superior bred Townsend products, the harder, literally built in growing characteristics, PAY OFF as no other plants will.
The Townsend 4-POINT GUARANTEE and what it means to you

Your assurance as to the properties and characteristics contained in EVERY plant that leaves our establishment. A concrete guarantee of highest quality and matchless value that CANNOT be measured in dollars and cents, and yet, true value, BECAUSE you receive a combination of high quality at a comparatively low price.

- QUALITY
  The good name of this firm and good will of its customers have been built and preserved by always handling nothing but the highest grade stocks available. Every plant or tree is the best that can be produced.

- TRUTH
  Old customers know that they will always get the variety they order. They have faith in us and we will not break it.

- HEALTH
  Every plant we ship is healthy, thrifty, and free from all injurious disease. Diseased plants will produce dividends for neither you nor us.

- PRODUCTIVENESS
  Every plant that goes into our propagation fields is selected for its heavy fructing crowns. In this manner our stock is kept on its high level in both productiveness and vitality. All plants are carefully packed so that you receive them in condition to grow strongly and to produce as you have the right to expect from plants bearing the Townsend name. Any stock received by you that does not meet these high standards will be replaced free. It is also understood and agreed that in no case will we be liable for any sum larger than the purchase price.

We Pack Goodwill in Every Bundle of Plants We Ship!

For almost half a century the name of Townsend has been synonymous with "square deal", value and top quality in the nursery business. We have tried to pack confidence into every package of plants that we have ever sent out. As an indication of the effectiveness of this extended practice, a good will, unparalleled in its extent, has been established almost from the very beginning. In order to hold this enviable position, Townsend must continue giving the same "square deal" every time you come to us with your order.

* In no case will we be liable for any amount larger than the purchase price.
When you purchase Townsend plants, you know that you are going to receive plants that are disease-free, and just waiting to demonstrate the vigorous, healthy and vitalized growing properties that 47 years of growing experience can produce. Tens of thousands of satisfied customers enable us to operate one of the largest plant growing and shipping businesses in the world. We, in our turn, endeavor each year to show our appreciation of this confidence entrusted in us by selling only plants that are authentically true to name and reflect our reputation by being the best plants that money can buy. Streams of letters from satisfied customers continuously praise the hardiness and the superior yielding qualities of Townsend plants. There is no secret behind these proven facts. You will find that Townsend Select Strain plants of approved varieties, will provide you with increased yields also.

We Will Help You Get Started
Since our best recommendations are not written—but grown—we are very definitely interested in the results that you get with our plants. We want to number you along with other thousands of satisfied customers, so allow us to make your problems ours. Even an inexperienced grower can enjoy the satisfaction (and profit) incurred by growing bumper crops. Ordinary care by you, coupled with the 47 years of growing experience that is behind the instruction under Culture Directions on pages 6 and 7 by us, can get you the desired results. Any instructions we have failed to include will be gladly sent to you, free of charge, upon request. We also issue a complete culture guide. This booklet is free and yours for the asking.

We Never Sacrifice Quality For Price
Every plant that has ever left our establishment, regardless of price, has been a true representation of the unequalled quality literally built into Townsend plants. Townsend’s lasting trade, a tribute to our policy of fair and courteous treatment, was built up through the years by consistent shipping of quality plants at the lowest possible prices despite the ever changing trend of the times. We have tried to pack both confidence and value into every package that we have ever sent out, thus assuring you of a square deal every time.

Claims and Adjustments
All claims, if any, must be made within five days from date you have received your shipment, along with a signed statement from your express agent or postmaster, showing extent of damage, so that we can make proper adjustment with you if necessary. We are not responsible for stock purchased after this time expires. Continued growth, as we all know, depends on weather conditions, soil, planting, and care, which is out of our hands and over which we consequently have no control.

Our Packing Method
When you order your plants from us, you are assured of receiving your order in a fresh, growing condition. The management of TOWNSEND NURSERIES has not spared any expense on research work pertaining to the shipping of perishable plants. Our NEW MODERN PACKING HOUSE, with CONTROLLED STORAGE assures our customers beyond any doubt that our plants are kept fresh, from the hour they come from the fields, until they are pre-cooled just before being delivered to the transportation companies enroute to you. Plants are packed into light (but durable) packages and ventilated crates. A portion of fine, cool damp sphagnum moss is placed around all the roots, to preserve the moisture, and to keep the plants perfectly cool while in transit.

Fibrous Roots
The fibrous root system is an important factor in getting a 100% stand after setting. To grow such a plant, proper soils and plant food must be used such as that on our plant farms. Our forty-seven years of experience in growing berry plants has given us valuable information on growing a properly balanced plant—one that will grow and produce the yields you have a right to expect.

Prompt Service Quick Deliveries
One and a half million plants a day . . . that’s our daily digging capacity! Weather permitting, our large crew is on the job 24 hours a day throughout the shipping season. This immense productive capacity is your guarantee of prompt attention and shipment of your order, regardless of size. A trial this year will convince you that with us, SERVICE is much more than just a word.

Clean Trimming of Plants Makes Easy Setting
Plants received from the nurseries well trimmed, not only saves customers time when setting, but also saves them extra transportation charges that must be paid for excessive decayed foliage on improperly trimmed plants. There is very often the added loss of the plants themselves, caused by the heating of this foliage in transit, which, in turn, causes bud decay or dried roots. This thorough cleaning of all plants is an important part played by our experienced plant diggers each year, and helps our customers to get high yields of quality fruit.
Fruit Problems

Why trees do not bear — How to prune — Why fruit drops prematurely — How to get size and color.

These and many other problems in fruit growing are answered in America's leading fruit magazine — published monthly on the first of each month. Subscription rate is 3 years for $1.00.

L. Sherman Townsend, Mgr., Salisbury, Maryland
Mr. L. Sherman Townsend,
Mgr. Townsend Nurseries
Dear Sir:

Just a friendly letter to advise you that the PREMIER, strawberry plants purchased from you in 1946, produced the largest crop of berries this season that we ever grew, better than 16,500 quarts to the acre. Plants purchased from you the past Spring are doing nicely.

THE WORLD'S TWO LEADING FREEZING STRAWBERRIES

Polar Queen, the world's best strawberry for quick freezing. Yes, that's the way we started advertising Polar Queen and our customers certainly back us up when they say "Polar Queen freezes for us perfectly when other strawberries fail." We still recommend Polar Queen. SO DO OUR CUSTOMERS.

Townking, another Townsend introduction to the strawberry world, has proved itself to be the best late strawberry grown anywhere. Planters large and small recommend Townking throughout the country, so without hesitation "we recommend Townking to you."

THE Premier strawberry is still the queen, and retains its popularity with thousands of individual growers because it puts a big crop of fine appearing berries on the market first every time, and does it under climatic conditions that often kill other varieties. No other variety can supplant Premier for all around superiority. Superiority as a money maker. Superiority inasmuch as Premier eliminates crop failure, and by fruiting and ripening days and often a week earlier, Premier never fails to command—and get—the highest price. Premier

VARIETY SELECTION.

Perhaps the most important task in berry growing is proper variety selection. Every single variety listed in our catalog has been thoroughly tested throughout the nation, and we will not list a variety until we have had this variety tried for several years, under various conditions.

Therefore a careful study of variety recommendations in this catalog will eliminate the possibility of purchasing a variety that is not profit makers if you are growing berries for the commercial market, or a complete success in your home garden. At any time that you are in doubt as to variety selection just write Townsend Nurseries.

SOIL PREPARATION.

Strawberries are very easy to grow, but like other growing plants, prefer fertile soil. Strawberries usually do well after vegetable crops, and we prefer the land to be plowed in late winter or early in the spring for commercial plantings. Plantings in the home garden the soil can be plowed or spaded to a depth of about seven inches in the early spring. Potato fields, tomato and bean fields are fine for strawberry growing after these crops.

Barn-yard manure, of course is fine when broadcasted over the soil in the late fall or winter months and plowed under, or worked through into the soil after the land is plowed. We find that a complete fertilizer mixture of about 4-8-5 and 5-10-5 analysis, (either one) applied on the soil after it has been plowed or worked up, at the rate of 1,000 to 1200 pounds per acre, and then disked or worked into the soil, AT LEAST TWO WEEKS BEFORE PLANTS ARE SET, three weeks is much better. Now in the home garden this would be applying the fertilizer at the rate of 2 1/2 pounds per 100 square feet, using the same system as described above. After the fertilizer has been applied and worked into the soil for two to three weeks before you are ready for your plants.

SET PLANTS IN ROWS.

For commercial plantings mark your rows 3 1/2 feet apart, some growers prefer 4 feet, with either a row marker or other equipment suitable. The plants can be set with either a hand trowel, spade, or on a large scale planting with horse drawn transplanter, as well as larger tractor transplanter. Which ever means you set the plants, makes little difference, but always pack the soil firmly around the roots and firm the soil well by compacting a portion of the deep soil, keeping in mind that the top of root near the crown of the strawberry plants should be level with the ground, this one point is important, be sure and unpack the soil around the roots, by keeping your plants covered and keep moisture.

TIME TO PLANT.

Every grower is just about insured with top success with berry plants when they are set into the soil in the very early spring. Meaning that as soon as the first days come along that you can prepare your soil in the Spring, do so, so that your soil will be all ready when the plants arrive. Townsend strawberry plants are hardy, and will withstand any freezing weather that you might have after transplanted in the Spring, since our plants are all winter hardened in the fields.

CARE OF PLANTS ON ARRIVAL.

Townsend plants come to you properly cleaned, and bunched into neat bundles, ready to set in your garden or field. Our plants are grown on deep loose furrow soil, and the full length of the root system you will receive. When the plants are set with a spade the roots going down straight into the soil, you can leave all the roots on the plant. When the setting is done by a garden trowel or transplanter the roots will have to be trimmed by clipping off a portion of the ends with a sharp knife, leaving the roots about 6 inches long, so they can be planted straight down into your soil.

Set the plants at once if possible when they arrive, dampen the roots just before setting, and keep the soil and Sun from the roots, by keeping your plants covered and keep moisture.

In case you cannot set the plants on arrival, then open the package of plants and keep the soil damp and unpacked for shipment. Dampen the roots of the plants but not the foliage.

Keep the plants in a cool place like a cellar for a day or two, if you find that the plants will have to be kept out of the ground longer than two days then place them into cold storage where the temperature is about 32 to 40 degrees.

MATING VARIETIES.

All varieties of berry plants that we offer are self fertile however, and will produce a full crop if planted alone. Varieties will not mix, when planted side by side.

MULCHING STRAWBERRIES.

In regions of heavy snowfall Strawberries should have a mulch to keep the ground from freezing and thawing in early winter and in the spring. In the Northern part of the Middle West all varieties should be protected against severe drying winds, which occur in those regions. A mulch conserves moisture in the spring and in certain localities the crop may be increased from one-third to one-half by its use.

The mulch should be applied as soon as the ground is frozen from one to two inches deep. In some localities growers have found it unsafe to await freezing weather because of the danger of severe storms or heavy falls of snow which remain throughout the winter, mulch being put on as soon as active growth has ceased. The mulch should be scattered over the fields so that some will fall on the plants, but more of it between the rows. In the spring the plants will grow up through the straw and the berries will be kept clean.

If mulch is put on heavy, some of it should be raked off into the middle of rows at time growth starts. Wheat, rye, oat and buckwheat straw are more commonly used. From 3 to 5 tons of straw is required per acre. Marsh hay is also used to advantage when obtainable, 1 to 3 tons per acre being required.

ONE OF THE SECRETS

In Growing Strawberries

While there should be no secrets in the growing of Strawberries when every grower is exchanging ideas with his neighbors, there seems to be one point that has not been given enough publicity by the neighbor, journalsm and nurserymen. With the majority of the plant growers in the North it has always been a practice to hold off setting plants until after frost and freezing is over. On low springy type soils this probably is a logical practice. However, on land with a good drainage and which dries out early in the spring this practice should not be followed. Strawberry plants, when properly grown and hardened, will stand considerable cold weather after setting.

- Complete Culture Guide on Small Fruits Will Be Sent Free to Anyone Requesting This Booklet
CULTIVATION. Tillage in newly planted strawberry fields or the garden, should start within ten days after the plants are planted into your soil. In commercial plantings, horse drawn cultivators are used, also garden tractors and light two row tractor cultivators. In the home garden, a small hand cultivator with two handles works very nicely. Plants should be hand hoed after the first cultivation, so as to break any crust that may form and to preserve moisture. Strawberry plants should be either cultivated or hoed every week or ten days, until the bed is formed about 30 inches wide, then usually the hoe work drops out about mid-July and the cultivator will take care of the cultivation. Keep all weeds and grass out of your strawberry patch.

Keep in mind with using the cultivator to use same shallow, this applies to the hoe also. Strawberries like shallow, but frequent cultivation.

REMOVING BLOSSOMS. After your plants become started after planting, there will appear on the plant 'flower stems commonly known as blossoms,' keep all blossoms removed from the plant soon as they appear. If blossoms are left on the plants, then the plants will become stunted. It requires only a little work and is an important factor in growing strawberries.

EVERBEARING VARIETIES and BLOSSOMS. KEEP ALL BLOSSOMS REMOVED FROM YOUR NEWLY SET PLANTS UNTIL THE LATTER PART OF JUNE. This will let your plants become permanently established quickly. After this date let the blossoms remain on the plants and they will form into berries for your late Summer and Fall harvest.

FERTILIZING IN THE FALL. Putting an application of 5-8-12 commercial fertilizer on your strawberries prior to the fall will make the grower larger profits than spring fertilizing. We have found that an application of the above fertilizer at the rate of 800 to 1,000 pounds per acre, applied on the beds the latter part of August up until September 10th, will make your fruit buds in the strawberry plants larger, and at the same time make you more fruit buds, for your coming Spring berry crop.

Apply the fertilizer, on the foliage when the foliage of the plants are PERFECTLY DRY, and then use a bush or burlap bag and gently brush the fertilizer off the plants foliage, so fertilizer will not burn the plants. In the Spring apply only 400 pounds of a 6-8-6 analysis fertilizer to the acre, when the plants are dormant, usually about MARCH 1st, in normal Spring.

The home gardener can use the same practice as described above for field culture using 2½ pounds fertilizer per 100 square feet of space planted to strawberries. In the Spring apply about ONE POUND per the 100 square feet. For the home gardener, when there has not been any fertilizer applied to the strawberry beds in the FALL, then we recommend 3 pounds of 6-8-6 fertilizer applied in the late winter or very early Spring, before the buds start growth. When the above mixtures are not available in fertilizers, we then recommend that you use VIGORO, adding 30 percent more than you do the above mixtures.

TOWNSEND SELECT-STRAIN PLANTS ARE GROWN THROUGHOUT THE NATION AND ARE KNOWN FOR THEIR HARDINESS AND BIGGER YIELDS "AT NO EXTRA COST"

OUR 47 YEARS EXPERIENCE IN BERRY CULTURE IS AT YOUR SERVICE

WORLD'S LARGEST GROWERS AND SHIPPERS OF STRAWBERRY PLANTS

Cultivating a large field of strawberry plants, grown under the supervision of L. Sherman Townsend, Mgr.
Developed from a cross of Royal Sovereign X Premier (Howard 17) by the U.S. Dept. of Agriculture. This relatively new variety has rapidly attained widespread popularity in every berry growing section in the country.

Taking its place high in the ranks of leading early berries, Dorsett strawberries are widely planted in every State in the union. Commercial growers know that its ready adaptability to almost any type of soil; its vigorously abundant growth (assuring good crops even in poor seasons) make Dorsett the kind of berry that comes through with paying crops. Its rich, attractive, bright red color, and its ability to retain firmness long after picking, makes Dorsett an excellent shipper (even over exceptionally long hauls) and the kind of strawberry that buyers pay more for. Each year more and more growers find that Dorsett strawberries are one of the best profit yielding early berries that it is possible to grow. To meet the ever growing demand for Dorsett, Townsend grows one of the largest plantings in the country. Literally millions of Townsen's Select Strain Dorsett are grown annually (Note: the above photo shows a thirty-eight acre block of new-ground grown Dorsett), and shipped to Dorsett-wise growers the Nation over.

DORSETT HAS EVERY DESIRABLE FEATURE!

Townsend's Select Strain Dorsett are Double Inspected, State Certified and true to name. Popular as an early ripening, big and regular crop, this "in demand" variety has been bred for larger yields. Regardless of how large or small your order may be — — send it in. We will be glad to service it for you. We can reserve plants and ship when you are ready to set.
A large acreage of Certified Fairfax developed under the personal supervision of Mr. L. Sherman Townsend

FAIRFAX

Famous for Heaviest Yields in the Early Market

You can tell the worthiness of any variety by its continued popularity. Sensational rise in sales of Fairfax has served as a barometer-like indication of the admirable results enjoyed by growers of this fine berry. Much of this success is undoubtedly due to the rugged hardiness of Fairfax. Even during seasons of drought, this variety will continue to thrive and produce money-making crops when other strawberries fail to survive. Leading all others in firmness, Fairfax is ideally equipped by nature for shipment to any part of the country, and its honey-sweet flavor has earned Fairfax the reputation of being "the most deliciously flavored of them all." Behind our recommendation of this variety lies years of careful plant selection that makes this variety more than equal to any berry for commercial planting. Devote a goodly portion of your acreage to Fairfax, thus insuring yourself a good crop of desirable strawberries regardless of weather conditions. Townsend's Select Strain Fairfax are Double Inspected and State Certified to be true to name, and recognized by leading growers as the heaviest yielding strain grown. Let us reserve some of these plants for you. We will ship whenever you are ready to plant.

FAIRFAX is Superior Because:

Quality is so outstanding that Fairfax leaves nothing to be desired.
Firmness plus is the word for Fairfax. Ideal for commercial marketing.
Flavor that is truly delicious. The finest eating berry on the market.
Productivity that more than compares with such popular beauties as Dorsett and Premier.
Size of fruit is very large and very uniform. Brings "top dollar" on any market.
Vigorous in its growing habits, Fairfax is noted for its abundantly flourishing foliage and hardy root system. The long and fibrous characteristics of its root system accounts for the amazing growth of Fairfax even under drought conditions.

CERTIFIED
Approved by
TOWNSENDS
ORIGINATED several years ago by the U. S. Department of Agriculture, this hardy strain has achieved remarkable popularity in states south of the Mason-Dixon line and as far north as Pennsylvania and the Ohio Valley. For an early, solid production that will be both economical and profitable, the Blakemore should be your outstanding choice. It is so sturdy that it will withstand heavy rains with small loss of fruit, so endurant that heavy plant growth can be accomplished in practically any soil, and vigorous enough to withstand more abuse and neglect in growth, picking or shipping than any other variety. The fact that the new yellow resistant Blakemore is held in high esteem is unquestionable. The sensational evidence is in the survey that revealed twice as many acres are planted in Blakemore than any other variety. As a matter of fact, 25% of all commercial strawberry acreage are planted in Blakemore.

As a scientific cross between Premier and Townsend's Missionary, its sizing is from medium to large fruit. Its yield is abundant. The fact that 80% of its crop is produced one week after the first picking makes it invaluable to producers of large quantities for the extra-early market.

The perfect commercial berry, it's tops in choice by canners and preservers. Because of its firmness, Blakemore can withstand long distance hauls and maintain its robust appearance.

We reserve plants on order and ship when you are ready to set—so order . . . . NOW.

As is the case in any other business where large quantities of diversified types (or varieties) of products are concerned, naturally a slight overage or surplus is realized. Since our business policy does not allow us to carry plants that have already been dug over to the next day, we must dispose of this surplus. We, therefore, are in a position to make this potential loss of ours your gain. The grower who is not especially particular about varieties can buy these plants at a sensational and tremendous saving. Every plant is freshly dug, labeled, and true to name. Because of these low prices, we regret that we cannot assume any responsibility for variety selection—please do not ask for particular varieties.

EVERY BUNDLE LABELLED AND OF APPROVED VARIETIES
WORLD'S LARGEST GROWERS OF STRAWBERRY PLANTS

MID-SEASON TO LATE FAVORITE

BIG JOE

For twenty-two years this dependable old timer has been coming through with paying crops for growers throughout the country. Ripening at the height of the season just about the time of the last picking of Premier and Dorsett, this variety comes upon the market just when large fancy berries—like Big Joe—can command top market prices. The size and appetizing beauty of this variety and its appeal to the public—an appeal measured in cash returns—has brought Big Joe nothing but continued praise.

OUTSTANDING WITH GROWERS THE NATION OVER BECAUSE OF:

• SIZE — Large to very large berries.
• COLOR — Rich, beautiful, double green cap.
• QUALITY — None better — ranks with the best. Tops for flavor and shipping.
• PRODUCTIVENESS — Under favorable growing conditions, cannot be equalled.
• VIGOR—Strong grower on most all types of soil. At its best on clay, or well drained, springy loam soil.

PRICE LIST ON PAGE 38

SENATOR DUNLAP

(DR. BURRILL)

THE LEADING WESTERN MEDIUM EARLY VARIETY

One of the leading varieties for Western states. This beautiful, glossy, dark red berry is deliciously sweet in flavor, and the ideal berry for canning and preserves. We grow, annually, hundreds upon hundreds of thousands of this popular western favorite, and always find ourselves sold out long before planting season is over. This in itself is mute testimony to the virtue of Senator Dunlap. The tremendous demand of our western trade speaks eloquently of the unequalled popularity enjoyed by this variety in that territory.

Vigorous Grower—Dunlap's deep feeding habit makes it possible for Dunlap to withstand considerable amount of dry weather; more so than any other variety. This reason makes it especially suited to western climatic conditions. It usually makes an excellent fruit bed under favorable growing conditions.

Fruit—A beautiful, glossy, bright red color with plenty of firmness for long distance shipping. Splendid quality when grown in regions adapted to it.
A GROWING FAVORITE WITH COMMERCIAL GROWERS BECAUSE IT'S A

S

evEERAL years ago, the northern half of this country found itself locked in the throes of a very serious plant disease. This disease, known as the Red-Steel root rot, played havoc with the then growing strawberry crops, and as a result, acre after acre of plants were destroyed. With the help of Professor C. E. Temple, of the University of Maryland, a new variety of strawberry plants evolved from the cross-breeding of plants that were the most resistant to the disease. This work has been carried on cooperatively by the University of Maryland and the U. S. Department of Agriculture, whose efforts finally produced this grand, disease resistant variety. As an acknowledgment for his part in the producing of this berry, the new variety bears his name—Temple.

BRED FOR HEAVY YIELDS • IMMUNE FROM DISEASE

Quality — Peerless and unsurpassed by any variety on our lists. An attractive looking deep red with excellent keeping qualities. Firm and admirably suited for shipment.

Size — Nosed for its extra large fruit that is further accentuated by a rich looking dark green calyx. It is generally referred to as one of the most attractive looking of all strawberries.

Production — Being the result of a cross between Aberdeen and Fairfax, both of which are outstanding for their growing habits, Temple therefore naturally possesses the vigor and vitality of its parents. Its foliage is a beautiful dark green and is resistant to leaf spot. The new Temple can be classed as a free plant maker and is an extra heavy yielding variety coming into fruit about the same time as Dorsett, and a far better shipper than Dorsett. Thus, we conclude that with commercial growers, the new Temple will eventually take the place of Dorsett.

DEEP FEEDER
DRUGHT STRAIN
GOOD PLANT MAKER
HEAVY YIELDER

"WE ASSURE YOU THAT IT WAS OUR PLEASURE—TO RECOMMEND TEMPLE"

Dayton, Ohio
July 24, 1947

Townsend Nurseries
Salisbury, Maryland

Dear Mr. Sherman:

Glad that we took your advice back in the Spring of 1946 and planted the Temple, strawberry patch. Where we could not grow strawberries before, the Temple produced large crops of beautiful berries the past season.

Many thanks for putting us back in the strawberry business once again.

You may be assured of our future orders, and your wide experience and service is tops.

Yours truly, B. L. U.
Catskill—The sugar flavored strawberry proclaimed as the heaviest yielding mid-season variety. The rise in popularity of this highly productive berry has been nothing short of phenomenal. Its fame with growers as a "super cropper", and its large, bright, shiny red fruit, has established for Catskill the highest record among all marketable, mid-season berries.

Its adaptability to a wide range of soils and climatic conditions has served to further make it an all around favorite. While our strain of Catskill is direct from the originators at Geneva, New York, we have, through careful plant selection, produced a strain that is considered by some of the largest growers in the country to be far superior in vigorous growing habits and heavier yielding qualities than any other strain of this same variety. In recommending this variety, we do not hesitate in assuring you that our strain of Catskill is one mid-season variety that is certain to prove more than satisfactory.

Superlative for Canning and Freezing

RICH COLOR—Bright, shiny red, similar to Big Joe. A double cap of green and its size and coloring make an attractive looking appearance when offered to the buyer.

SIZE—The extra large size of Catskill, from a commercial grower's standpoint, is undoubtedly its greatest attribute. This fact makes Catskill a more than outstanding value, and causes it to demand higher prices at market time. Catskill keeps its size well until the last fruit is harvested.

QUALITY—Its very fine texture, and its ability in holding up well after picking, makes this variety an admirably suited berry for long distance shipping—a fact that is appreciated by berry growers. On a par with such outstanding berries as Premier, Dorsett, Fairfax, Chesapeake and Big Joe, the flavor of Catskill makes it a much-in-demand commercial value.

PRODUCTIVITY—Big profits in every state east of the Mississippi—and in several states west, have lent substantial support to the general enthusiasm voiced by growers of this prolific variety. Due to results realized in our own test plots, we heartily agree with these growers that Catskill is the heaviest producing mid-season variety ever grown. We cannot see how any grower can fail to make big profits. Nothing short of an outright calamity can keep Catskill from coming through with bumper crops.

Millions of Select Strain Catskill, All Double Inspected, Await Your Order

To insure the filling of your order and to meet the increased demands for Townsend's Select Strain Catskill, we have once more increased our acreage. Our plants look fine and healthy, and are amply demonstrating Catskill's lush growing characteristics with abundant heavy crowns and hardy, fibrous roots. To get the pick of the crop—order early.

SEE COMPLETE PRICE LIST ON PAGE 38
Chesapeake

WELL KNOWN PROFIT MAKER OF LATE VARIETIES

CHESAPEAKE has always had a host of friends, and in sections where late berries are in demand, this peerless member of the berry world never fails to command higher prices. To commercial and home growers in the northern states (growers who know), Chesapeake is considered as just about the last word in beauty, size, rich coloring, firmness and attractiveness in a truly fancy strawberry. Thriving best on damp, rich loam or springy type soil, this variety ripens three or four days before Townking and is ready for market when most late varieties are all through.

Chesapeake Dominates The Later Varieties Because:
A. Sure cropper. Exceptionally late and an excellent shipper.
B. Doesn’t discolor after picking, and retains bright, rich red color for several days.
C. Average size, 20 to 30 berries to a quart. Chesapeake is a distinctive high quality berry that brings top market prices.

SPOTLIGHT SPECIAL

500 CHESAPEAKE 500 PREMIER 1000 Select Plants
Cat. Value $17.80 ONLY $15.95

BUY DIRECT FROM THE WORLD’S LARGEST — AND SAVE MONEY!
The results of eight years of testing on our trial grounds, and the impressing record compiled by Xtralate over this period of time, bears evidence as to the successful development of this particular variety. Especially developed by Townsend to meet the great demand for a truly later than late berry, Xtralate not only fruits later than any known existing strawberry, but has proven itself to be one of the heaviest yielding and hardiest varieties on the market. For added profits, we strongly urge the planting of this variety. Thousands of planters have been amazed at the sight of this plant laden with fruit when all other varieties are through — why not you.

Many of the larger growers in New York State refer to this new variety as a real dandy. Although still in its infancy, Sparkle shows plenty of promise, and for growers in New York, the New England states and northern Pennsylvania, we do not hesitate in recommending this new berry. Try a thousand or so of these plants this Spring. We are sure that you will be more than satisfied.

Sparkle’s rich, red, and really attractive berries have great market potentialities, however, unlike the New Temple, Sparkle tends to darken somewhat when left on the vines until fully ripe. Because of this fact, many growers favor the Temple, since Temple holds its color. We offer Sparkle as a new variety, however we do not recommend the planting of this variety in any great numbers until it has been more thoroughly tested. Sparkle ripens about mid-season.
DEVELOPED as the aristocrat of all late berries, Townking's perfection is unsurpassed. The careful nurturing of this Select Strain variety has produced a plant that can be grown in a wide selection of soils and under diversified climatic conditions. Grown through the length and breadth of the United States, Townking has proven itself to be the most profitable late variety on today's market. Topping by far other late varieties in yield, Townking produces a rich, lustrous red fruit with a skin texture and bodily makeup that is so firm that shipment to distant points can be accomplished without impairing the quality. Truly a king among late berries, Townking, by actual report from the Allegheny County Agricultural Extension Association, surpasses by far such varieties as Lupton, Chesapeake and Big Joe in size and yield. This "in demand" variety can ONLY be purchased from Townsend Nurseries. ORDER NOW. Plants will be held until time for setting.

Townking stands alone for money-making qualities. From the Atlantic to the Pacific, from Maine to Florida, including Texas, Townking stands as the undisputed king among profit yielding late berries. Premium prices, regardless of the locality of the market, are always paid for this variety. Its outstanding color, shape, size and appearance are the prominent factors behind its appeal. Without a doubt, Townking definitely stands alone as the most perfect late strawberry ever grown. Cash in on this tremendous planting opportunity. Get your share — give it a trial this year.

YOU CAN BUY TOWNKING FROM TOWNSEND'S NURSERIES ONLY. WE GUARANTEED THAT TOWNKING WILL PLEASE YOU OR YOUR MONEY WILL BE REFUNDED.

Compare These Points of Superiority:

POLAR QUEEN

The "QUEEN" of All Strawberries for Quick Freezing

VERSATILITY—Admirably adapted to prosper and thrive in any locality where strawberries are produced. Not only a competitor to such berries as Blakemore, Premier, Fairfax, and Catskill, but definitely superior on many counts. A truly versatile strawberry inasmuch as it flourishes in any type soil, however, like most varieties, it grows best in damp, fertile soil.

SIZE—In comparison to such popular strawberries as the Blakemore and Fairfax, the Polar Queen fruit is oftentimes as much as 40 per cent larger and holds its size well, even to the last picking, thus insuring top prices on any market.

EYE-APPEAL—Especially appealing to a buyer's eye because of its beautiful, bright, shining red color that goes through to the very core; its complete absence of a green tip; its solid firmness and the tendency for the green cap to grow well away from the berry, making it easy to remove. Its sold red color runs well up under the cap showing a minimum of light red. Polar Queen is a combination of outstanding features that can't be beaten.

VIGOROUS PRODUCTIVITY—Polar Queen makes a strong and healthy fruiting bed on a wide range of soils, and its extra-heavy yields are the talk of the trade.

"LARGE GROWER LIKES POLAR-QUEEN IN MAINE"

Orris Island, Maine

I am recommending POLAR-QUEEN to be one of the best strawberries grown. The plants will grow where others fail all planted in the same field. As for all strawberries I prefer POLAR QUEEN exclusively.

Ralph W. Judkins

GROW POLAR QUEEN for MARKET and FREEZING

AN EXCLUSIVE BERRY INTRODUCED BY L. SHERMAN TOWNSEND

Almost instantly acclaimed as the ideal berry for home use or market freezing, Polar Queen (trade mark registered) has more than made its mark since its recent introduction by L. Sherman Townsend. Growers in state after state have been quick to realize the tremendous profit yielding potentialities of this truly superlative berry. Specifically developed for quick freezing, Polar Queen is the real Queen of them all. Don't miss this opportunity to be among the foremost to cash in on assured profitable planting.

**NORTHERN STRAWBERRY PATCH**

Salisbury, Maryland, long established as the largest strawberry propagating center in America, has held this coveted position because of its ideally situated locale. Located on the Eastern Shore, about mid-way between the northern most extremity of Maine and the tip of southern Florida, Salisbury is subjected to varying intensities of climatic conditions throughout the year. Therefore, it can be readily understood that anything that can be propagated in this particular locality, can be successfully grown in any other part of the country—permitting, of course, the presence of the proper type soil. Our plants are preferred by growers in Maine, New Hampshire, Canada and other areas where temperatures drop to 20 degrees below zero. Townsend Nurseries, located in Salisbury, is the largest growers and shippers of strawberries in the world. Any nursery product bearing the Townsend label has to be the best obtainable, because Townsend's 48 years of Nursery experience stands behind every product.

THE NEW EVERBEARING GEM

One of the finest everbearing varieties of recent introduction, and a true "gem" of nature. The fine flavor and rich quality of this berry promises to establish it high in the ranks of everbearing leaders in short order. The New Everbearing Gem is a heavy yielding, rugged plant maker, and in its long season of ripening, it fruits extra large, rich red berries that can't be equalled. Especially adapted for planting in northern states, this variety also flourishes as far west as Missouri, and produces during a long season—well into freezing weather.

New Evermore

Keeps Well After Picking

Developed by the Minnesota Experiment Station, the New Evermore has literally taken the country over by storm. It's long, pointed berries—solid red through and through—with a flavor second to none, have proven themselves to be rugged and abundant in growth as well as excellent shippers. This variety is a tremendous commercial value, inasmuch as Evermore has been known to keep—without refrigeration—for as long as 5 DAYS without showing signs of mold in the hottest weather. And too, the New Evermore continues to produce until the snow begins to fly.

Mastodon

The Giant That Reigns Supreme

Still proving itself to be a dependable, profitable investment—year after year—Mastodon's luscious, giant berries stand behind its fame. Just think—you can harvest a crop 10 WEEKS after planting—AND—Mastodon continues to fruit throughout the entire Summer and Fall—AND—then fruits again in the Spring. For value galore, marketing potentialities. Thousands upon thousands of commercial growers have made Mastodon the most widely planted strawberry in existence. Sometimes referred to as "The Wonder Berry", this variety is supreme among everbearing berries. Equally suited to small gardens, Mastodon's delicious fruit can be an ever present table delight. Be sure to set aside a definite portion of your acreage or garden for this variety.

VERBEARING STRAWBERRIES

Fortunately, within a few short months after your plants are set, you are ready to pick big, dark red all the way through RING STRAWBERRIES! And, best of all, you can continue picking them from —

JULY until NOVEMBER

The rugged, everbearing varieties have literally taken the country by storm. Remember — with these varieties you do not have to wait a year for fresh berries.

Streamliner

Streamliner strawberry is as ultra-modern as its name implies. Townsend's Select Strain of this comparatively new variety has brought raves from thousands of growers that rate cash returns as paramount factor by which to judge. Quotations from streams of letters from satisfied customers include such phrases as: "... probably the largest of all strawberries; "... deliciously sweet and flavorful;" "... solid red color—all the way through;" "... superb for cooking—excellent for freezing;" "... so firm;" "... incomparable skin texture;" "... Productivity? Say, I'll take all I can get."

Streamliner will bear fruit right through to November, and also fruits again the following Spring. Our entire acreage of Streamliner is at your disposal. GET YOURS WHILE THEY LAST.

New Gemzata

A Tribute to Better Breeding

The development of a cross between Gem and Gemzata. Gemzata is a definite triumph in plant breeding. Being, in all probability, the greatest everbearing strawberry of all, our recommendation of this variety can only be at its best a gross understatement. Our own method of propagation has undoubtedly brought out the best qualities of this superior berry. The fruit of Gemzata resembles Gem but averages larger, and has a fine, sweet flavor. A vigorous grower, it is resistant to leaf spot and produces constantly throughout the summer months. Gemzata is truly a fine everbearing berry and we recommend it highly.

PLANTS SET THIS SPRING

Fruit in 10 Weeks

Plenty of Fruit Until Snow Flies

The most practical solution to year 'round profits unquestionably lies with everbearing varieties. Beginning as early as just 10 weeks after planting, Townsend's Select Strain Everbearing varieties, Gem, Gemzata, Streamliner, New Evermore, and Mastodon start making money for you. Amazing? Yes, but profits in the pocket of everbearing-wise growers cannot be denied. After the plants are set in early Spring, they fruit the entire Summer, continue through the Fall, and fruit heavily again in the Spring. Who could ask more? Townsend's everbearers give so much for so little in care and expense. No home garden or commercial grower's acreage is complete without these famous everbearers.
THE NEAREST THING TO YEAR 'ROUND PROFITS

THE NEW EVERBEARING

GEM

One of the finest everbearing varieties of recent introduction, and a true "crop" of pleasure. The fine flavor and rich quality of

A BOWL OF DELICIOUS GEM

dish berry promises to establish itself high in the ranks of everbearing leaders in short order. The New Everbearing Gem is a heavy yielding, rugged plant under, and in its long season of ripening, it fruits extra large, rich red berries that can't be equalled. Especially adapted for planting in northern states, this variety also thrives as far west as Missouri, and produces during a long season—well into freezing weather.

New Evermore

Keeps Well After Picking

Developed by the Minnesota Experiment Station, the New Evermore has literally taken the country by storm. It's large, pointed berries—solid red through and through—with a flavor second to none, have proven themselves to be rugged and durable in growth as well as excellent shippers. This berry is a tremendous commercial value, incomparable to Evermore which has been known as the first variety to bear after May—due to its own merits. But most important of all, Evermore has been known as a berry with very little after picking—drawing a few days with the heat of summer and a little hard weather, none of the New Evermore comes through in good shape until the snow begins to fly.

Mastodon

The Giant that Reigns Supreme

Still proving itself to be a dependable, profitable investment—year after year—Mastodon has been known to produce good berries and handsome yields for its generous size. Only when the plant is young is it necessary to give it proper care and weeding, just as with any other berry. But when the plant is grown, it can be grown on its own roots and the yield is sure to be excellent. The Mastodon is a variety that is sure to please even the most critical berry lover.

Pick Big, Red, Deliciously Flavored Berries

SIX MONTHS IN THE YEAR

J ust think...in a few short months after your plants are set, you are ready to pick big, dark red all the way through FRESH STRAWBERRIES! And, best of all, you can continue to pick them from JULY until NOVEMBER. The rugged, everbearing varieties have literally taken the country by storm. Remember—with these varieties you do not have to wait a year for fresh berries.

Streamliner

Invoking Praise from Coast to Coast

The Streamliner strawberry is as ultra-modern as its name implies. Townsend's Select Strain of this comparatively new variety has brought raves from thousands of growers who rate cash returns as the paramount factor by which to judge. Quotations from streams of letters from satisfied customers include such phrases as: ":...probably the very largest of all strawberries"; ":...deliciously sweet and flavorful—full color"; ":...solid red color—all the way through"; ":...superb for canning—excellent for freezing"; ":...so firm"; ":...incomparable skin texture"; ":...Productivity? BIGGEST COMMERCIAL MONEY-MAKER OF ALL BERRIES!

GIANT CULTIVATED

BLUEBERRIES

NO LONGER can blueberries be classed as an ornamental novelty. The great earning capacity of the cultivated blueberry has not only amazed and delighted growers, but the same money-making qualities have resulted into added thousands of acres of blueberry bushes making their appearance in almost every state of the Union. Thousands of growers have been quick to realize that the large, cultivated blueberry has unlimited possibilities as a fresh fruit or a canned berry, and as such, the market demand cannot fail to be tremendous. Through improved propagating methods, Townsend’s cultivated berries have been taken out of the experimental stages, and are producing bushes that grow and thrive satisfactorily in any section of the country where proper soil moisture and acidity can be provided. Our customers are loud in their praises of the productivity and generous profits realized from Townsend’s blueberry plants.

- 25c TO 75c PER PINT
- $1000.00 PER ACRE

Townsend’s Giant Cultivated Blueberry Plants are famous inasmuch as the very first crop generally more than pays for the plants. And too, remember that—once planted, blueberry plants will last—and continue to yield added profits for a good many years. Alert growers will do well to take advantage of this golden opportunity. We recommend planting at least two different varieties to insure better pollination and greater yield of fruit. All varieties furnished labelled true-to-name.

Every home garden should have at least six blueberry bushes.
BLUEBERRIES ARE ORNAMENTAL AS WELL AS HIGHLY PROFITABLE

- **CABOT (Early)** One of the earliest of all varieties, this highly prolific blueberry plant is an established favorite with growers. Its dependable and heavy bearing habits, coupled with the extra large size of its well formed attractive berries, account for Cabot’s popularity. A vigorous grower, Cabot develops naturally to well formed plants.

- **RANCOCAS (Medium Early)** This unusually heavy fruiting variety has a tendency to produce extra heavy crops on young plants. In fact, the yield is so heavy that special care must be taken to prune the bushes severely in order to insure a good crop in the following year. Rancocas ripens later than Cabot but earlier than Pioneer, and the berries often exceed 19 mm in size.

- **CONCORD (Mid-season)** Often attaining height in excess of six feet, Concord is of upright habit and matures at about the same time as Pioneer. Its berries are often three-quarters of an inch in diameter, and when its large clusters all ripen at the same time, they resemble Concord grapes. Concord berries are delicious to the taste, and if allowed to remain on the bush until they are fully ripe, they lose the excessive acidity they possess when they first turn blue. Not only does Concord possess tremendous commercial value, but it is also an attractive, eye-catching, ornamental plant.

- **PIONEER (Mid-season)** Classed as an excellent shaper, this is the first named variety to come as a result of intensive blueberry breeding. Its fruit ripens about ten days to two weeks after Cabot, and its large, light blue, acid-free, sweet tasting berries have given Pioneer an impressive market record. The bush makes a vigorous growth and tends to spread in width rather than height. Its stout, stiff stems give Pioneer a hardiness that all but guarantees a maximum of productivity.

- **RUBEL (Large Mid-season Variety)** Recognized as the best of all commercial varieties, Rubel is undoubtedly one of the finest of the wild selections. The bush is upright, very vigorous, hardy and productive. Many of the present hybrid varieties can trace their parentage to this variety. Rubel is widely planted, and a profitable and popular favorite with thousands of commercial growers because of the excellent, though somewhat acrid, quality of its berries, which not only ship well but are in constant demand. With Rubel blueberries as your product—you can’t miss in a profit yielding market.

- **JERSEY (Season Late)** The berries of Jersey are unquestionably the largest of all the varieties, however until dead ripe, they are too acid for the taste of most persons. Jersey is a firm, robust berry that stands up well in transit, and is considered by growers to be one of the leading late varieties. Its light blue berries ripen about the same time as Rubel, and Jersey’s remarkably beautiful growth also makes it attractive as an ornamental plant when grown in any home garden.

**JUMBO BLUEBERRY IN BEARING PLANT A FEW THIS SPRING**
RHUBARB

- **McDONALD** You'll want some of this new, early producing, red, sweet rhubarb. Originated in Canada, McDonald outyields most other varieties. Milder to the taste, McDonald produces stalks two feet tall that are red all the way down.

- **MYATTs LINNAEUS** An early variety possessing a tangy flavor making it admirably suited for pies and sauce. Produces big crops of large, tender stalks.

- **QUEEN** Vigorous grower. Produces extremely large stalks of high quality. A really tremendous commercial variety.

Maryland Golden averaged 415 bushels U. S. No. 1 to the Acre

MARYLAND GOLDEN SWEET POTATOES

It pleases us to once again offer the most outstanding sweet potato on the market today — Maryland Golden. From constant reports received from our customers this year, we are convinced that there is not a sweet potato on the market today that demands — and consistently gets — the premium prices that this variety gets. Its money-making abilities for both the commercial grower and the home gardener have been nothing short of sensational. As was the case last year, the demand far exceeds the supply, and it is our opinion that this situation will remain prevalent for many years to come. Do not discount enthusiastic reports on this wonderful potato. Get in on the profits yourselves — do it now.

Specifically good for northern climates because of its early maturing habits, Maryland Golden is all that its name implies. Its coloring is a rich yellow that remains with the potato even after cooking. It is not of the dry type like Little Siem Jersey, or of the wet type like Nancy Halls or yams. At any state of maturity it is only slightly moist. Much as we would like to continue to tell you about this variety, space limitations in this catalog dictates the brevity of this write-up. Therefore, we have printed an illustrated folder on Maryland Golden which will be sent to you free upon request.

Remember, last year we were sold out long before the season was over. See to it that your order is filled. Order now.

SEASON TO SEASON PROFITS IN ONE INVESTMENT IN

Select Strain ASPARAGUS

- **MARY WASHINGTON** Truly the "Blue-blood" of the asparagus world, this best by far variety is the talk of the farms. Its extra heavy crowns and long, fat roots have made it exclusive with commercial growers that demand (and get with Mary Washington) asparagus that are strong and of giant size. Mary Washington is an exceptionally strong grower, its stalks are a rich green in color, and are as tender as can be. This much in demand variety was originated by the U. S. Department of Agriculture, and is considered highly rust-resistant.

- **MARTHA WASHINGTON** A result of select strain breeding, this versatile strain contains much of the original Washington characteristics in addition to having a heavier stalk, being a better producer, and being practically blight-resistant.

- **PARADISE** Sensational in all of its aspects, this strictly new variety is drawing raves wherever it is planted. Growers are amazed to see straight, large stalks that grow from roots set the previous spring, and its many fine qualities such as crisp, tender stalks and exceptionally mild flavoring, pays off at market time. Paradise brings cash returns one year earlier than other varieties. Make sure your garden or farm acreage includes this new and superior money maker.

HERE'S HOW SATISFIED CUSTOMERS REFLECT TOWNSEND'S QUALITY, VALUE, FAIR DEALING

"ONE LARGE CONCERN TELLS ANOTHER"
Dear Mr. Townsend:
Carrizozo, N. M.

Thanks for your cooperation in getting the plants to us on time, sorry that there was a mix-up in ordering the plants from some literature put out by your competitor, you are the people we originally intended to do business with, so every thing is O.K. — Your friend, the owner Lawton Canning Co. pointed out the POLAR-QUEEN. We have a 25 acre field almost planted now, stop in and see us.
Sincerely yours
Cappella Farms
By: Carl Cappella, Mgr.

"NOTHING LIKE SELECT-STRAIN-PLUS EXPERIENCE IN HANDLING PERISHABLE PLANTS PRE-COOLED"
Dear Mr. Sherman:
Shelton, Conn.

First I want to thank you for sending the strawberry plants out of season as per my wishes (month of June). Plants arrived in good condition, I was working in a shop and did not get the plants all planted until 2 1/2 weeks after they arrived. After I set them the weather conditions was dry for 3 weeks, BUT JUST AS SOON AS THE PLANTS WHERE SET — THEY TOOK HOLD, AND THEY SURE DID GROW. Thanks to your sturdy plants. I will order in early January next year.
Very truly yours
Mr. Charles J. Moulthrop

"A TOWNSEND CUSTOMER FOR OVER 20 YEARS"
Dear Sir:
Drennen, West Va.

We have been raising berries from your plants for over 20 years with success, and always recommend Townsend Nurseries.
Mrs. Guss Mason

"I AM ALWAYS A TOWNSEND CUSTOMER"
Dear Sir:
Mt. Pleasant, Penna.

Please find enclosed order for PREMIER, your Select-Strain. I am always a Townsend customer.
George A. Miller

"WE LIKE YOUR SELECT-STRAIN BERRY PLANTS"
Dear Mr. Townsend:
Delaware, Ohio

We like the PREMIER, purchased from you in 1946, and will need 8,000 plants this Spring.
Earl Bieber

"SON Follows in Father's Foot-steps"
My father, always used your strawberry plants, and they were always top quality. My mother handed me your new catalogue. I will send you an order, on receipt of information asked.
Urban J. Selm

"TALK OF THE NEIGHBOR"
LARGEST BERRIES EVER SEEN"
Dear Sherman:
Bellefonte, Pa.

My strawberries are the talk of the neighborhood, they have never seen anything like them. Last year’s berries large as good size hen eggs (everbearing) up until November. We want more plants and trees.
Mrs. Dorothy Magon

"PLANTS ARRIVED AS USUAL—IN GOOD CONDITION"
Dear Sir:
Lake George, N. Y.

The 1200 TEMPLE, arrived in usual good condition, but they will have to ‘go some’ to bear the PREMIER, which plants we have always purchased from you.
Edward Sleight

"LIKES DORSETT ON THE WEST COAST"
Dear Sir:
Baker, Oregon

The Dorsett strawberry plants arrived in good condition, from ocean to ocean shipment. Berries are the finest we have ever had, hoping that you can fill this order also.
R. K. Street

"BUYS TOWNSEND'S SELECT-STRAIN EVERY YEAR"
Dear Sir:
Cincinnati, Ohio

Please find enclosed order for your new variety 1,000 plants. I buy all my plants from you every year and I sure get good crops.
Henry Hagedown

"TOWNSEND SELECT-STRAIN"
TALK OF THE TOWN IN N. H.

Gentlemen:
Boscawen, N. H.

The 1,000 plants purchased from you are the talk of the town and County. The patch is certainly beautiful, looking forward to a ‘bumper crop’.
Mrs. Scott Sanborn

"LIKES OUR PROMPTNESS AS WELL AS PLANTS"
Dear Mr. Townsend:
Westwood, N. J.

Wrote you for advice and your reply was prompt and helpful. We received your strawberry plants and they have grown beautiful.
Henry T. Bolash

"WE WILL BE HERE TO SERVE YOU"
MR. STOVER AND THANKS"
Dear Sirs:
Lewisburg, Pa.

Our strawberries are growing beautifully, and we hope them once a week. Our next year’s plantings will be largely raspberries, I trust that you will be able to serve us.
H. E. Stover — Super. Principal
Lewisburg Schools

"WE SHIP MILLIONS OF PLANTS INTO THE STATE OF MASSACHUSETTS, YEARLY"
Dear Mr. Sherman:

Please find order attached for 10,000 Carskill and Premier. Your plants have always grown for us and produced ‘bumper crops’. Made money when others have failed.
Harvey S. Rose

"TO WHOM IT MAY CONCERN"
Dear Sirs:
Ambler, Pa.

We have found your nurseries very generous, always living up to more than your part of the bargain. I recommend your nurseries to any one who wants to deal with more than honest nursery, it is a great satisfaction to know that we have your class in the Country. Needless to say I am a booster for the ‘best of all nurseries’ where your word is just as good as gold.
Wm. N. Copeland

RASPBERRY GROWERS!

Here's Real Value

Thousands of Growers in 48 States

Set Townsend's Select Strain

RASPBERRY PLANTS

Townsend's heavy rooted raspberry plants are the results of extra care in breeding. Townsend's Select Strain certified plants.

Bigger profits for raspberry growers every time when their patches are set in Townsend Select Strain certified plants. This is not just a casual statement but an established fact. Heavier yields without precedent in their amazing intensity, have made these plants a sure thing for any grower. Our propagating field is set in the most ideally suited soil for raspberries, and during the growing season, they are constantly inspected for any kind of disease that might appear. In order to maintain Townsend's reputation for excellence, our plants are under the close supervision of raspberry specialists, and only plants worthy of our reputation are produced. Twice a year State inspectors visit our plantings and carefully inspect all growing plants. Townsend's plants come to you doubly inspected and carry with them a certified seal pronouncing them free from mosaic and other injurious disease.

FOR LOWER PRODUCTION COSTS AND HIGHER PROFITS

Growers in every state in the union set Townsend's raspberry plants last year. This in itself is a tribute to Townsend's conscientious and absolutely thorough method of disease prevention. Thousands of planters have been quick to realize that one sure way of getting heavier yields, thereby realizing increased profits, was to set healthy plants that have been grown right, packed properly, and delivered to them in prime growing condition. Our years of experience plus our superior propagating methods have served to assure us that Townsend's Select Strain certified raspberry plants will practically double your yields, thus cutting cost of production and naturally affording greater cash returns.

Raspberry plantings are good for several years. Why risk an investment and waste valuable acreage. When you plant raspberries, plant the best that money can buy. Don't gamble on inferior stock. Our prices are reasonable. You are bound to be pleased.

48 Select 1 Year RED RASPBERRIES
FOUR VARIETIES 12 PLANTS EACH
LATHAM, KATHRINE, SUNRISE, CHIEF
$5.95

Showing a Field of Double Inspected Latham 1 Year After Set
BLACK RASPBERRIES

For prolific fruiting, a good black raspberry patch cannot be equalled. Black raspberries unquestionably have established themselves as one of the most profitable of all farm crops. This is especially true when you set strong, healthy canes that are capable of maturing large crops. Our Select Strain certified raspberry plants are beyond a doubt the finest obtainable, and will lead the field in almost any respect regardless of the section they are planted in. These plants are "tops" in value, unsurpassable for quality, and a bargain you can't pass up. Diseased and run out fields average only from 400 to 800 quarts per acre — while healthy, disease-free plants will yield from 1600 to 3000 quarts per acre. These figures tell the story. Invest in Townsend's Select Strain certified plants so as to profit from this big difference. Place your order now. We'll ship when you're ready to set.

New Mammoth Morrison

A lustrous ebony in color, this black beauty is the king of all raspberries. Morrison fruits the largest berries of any known variety — yes, even larger than attractive and largest berry seen in years, is firm throughout with a fine, rich texture, and has less seeds than other black raspberries. From Pennsylvania clear into Michigan, commercial growers know that Morrison's superior fruit sells at a premium at all times. This, in conjunction with Morrison's tremendous yields, make a highly profitable crop in any field.

Be Sure to Grow Cumberland!

Truly the breadwinner of the black cap family, this variety is undoubtedly the most widely planted black raspberry grown today. Cumberland's outstanding leadership stems from continuous and consistent profits realized by commercial growers year after year. Unsurpassed for market value, this variety's large, plump and tasty fruit has proven itself to be a true family table delight. Cumberland is practically seedless and when crumbling, with exceedingly desirable firm texture, which makes it a fine shipper. The ripening season extends from mid-season to late, and its vigorous, hardy bushes are admirably capable of supporting Cumberland's large crop of fruit. Our stock this year of Certified Cumberland plants is exceptionally fine, and we are confident of the fine results that you will obtain from this variety. For a profitable fruit crop covering a long period, plant Cumberland.

TOWNSEND'S FINEST RASPBERRY GARDEN

2 Collections ONLY $8.25

The ideal raspberry garden, containing world's leading reds and blacks.
1 year No. 1 grade.
12 Latham (Red)
12 Morrison (Black)
All For $3.25

NEW LOW PRICES ON CUMBERLAND THE BEST THAT MONEY CAN BUY
Latham has been the standard by which raspberries have been judged for years. This Blue Ribbon winner is unexcelled and unchallenged. Unprecedented enthusiasm and a demand that far surpasses the supply, has made this sensational berry a veritable king in the berry world. Latham, without a doubt, is the finest looking berry on the market, and is famous with commercial growers because it produces more berries than any other variety and does so with an AMAZINGLY SMALL AMOUNT OF CARE.

Sensational profits are a glowing tribute to Latham’s king size, luscious red fruit—so appealing to buyers because of its appetizing appearance and delightful flavor. This tremendously productive variety is a tall, vigorous grower, and planters report that an average of $1000 per acre of plants is realized with Latham. In addition to this, Latham’s firmness and lasting qualities make it an excellent shipper. Free from mosaic, Townsend’s Latham’s is one variety you can’t afford to pass up. Order some today—we’ll hold them until you’re ready to plant. Latham can’t miss—whether you raise to sell or to serve.

**THE EARLIEST RASPBERRY OF THEM ALL**

Possessing some of the best characteristics of its parent, Latham, Chief is finding no competition in the very early raspberry marker. It was selected from a planting of 4000 Latham seedlings by the Minnesota State Breeding Farm, and has become the best early red for general planting—surpassing all others. It has proven itself, by performance in the field, to be a hardy, disease-resistant, heavy cropper of unexcelled quality. Chief ripens ten days earlier than Latham, and the fruit, while not quite as large as Latham, is firm, bright red color, an excellent shipper, and reaches the market when berries are at a premium. And, of course, Chief is immune to mosaic and mildew, and, like Latham, is an unusually heavy producer. All of these facts add up to an imposing score, and make Chief a good money maker on any market anywhere.

**Townsend’s Raspberries Are Certified FREE of Disease**

**Sunrise**

**VERY EARLY**

**VERY LARGE**

**VERY HARDY**

Coming to you as an improvement over all other early varieties, Sunrise, introduced by the New Jersey Experimental Station, is a new variety that more than stands out in the early field. Its bright, glowing red extra large berries, its long picking season (often producing fruit when Latham is done), and its high quality and choice flavor make it a “must” with many growers. Townsend’s Sunrise plants are healthy and vigorous growers—excellent for shipping and fine for canning. Supply limited—ORDER EARLY.
Field of Indian Summer—Leading Red Everbearing Variety That Produces Good Results Every Year

**KATHERINE DESIRABLE EVERBEARING RED**

Numbered among the best red raspberries ever grown, Katherine is a consistently prolific producer from early Spring to late Fall. Fruits an uncommonly large, firm and attractive berry of excellent flavor. You can’t go wrong with Katherine. Order early.

**ST. REGIS AN EVERBEARING RED IN GREAT DEMAND**

This variety ripens within 80 days of setting and flourishes in most any type of soil. Fruits well from initial ripening in early Spring and throughout the Summer. Produces mightily again in the Fall. St. Regis is a valuable investment for both market or home growers.

---

**Pick Berries Summer and Fall!**

THOUSANDS of growers in practically every state east of the Mississippi are reaping sensational profits by being able to harvest and pack berries for market throughout early Spring and the entire Summer and again in the Fall. Amazing! Yes—but it’s easy to do when you plant Fallbearing varieties. Townsend’s Fallbearing raspberries are easily grown, fruit the very first year set—and continue to do so for a number of years thereafter. Both commercial growers and home gardeners alike have found these varieties to be profitable investments. (To increase Fall production, the new growth should be sheared back about 18 inches after the Spring crop is harvested.)

**Indian Summer MAMMOTH RED EVERBEARER**

A tremendous sensation because of its giant size, delicious taste and appealing beauty. And, sensational also in that it bears a bumper crop in June and an immense crop again in the Fall. Its wonderful keeping qualities and its unusually large, glossy red, cone shaped berries have earned for Indian Summer the reputation of being the greatest all-purpose raspberry yet. This variety is certainly a worthwhile investment. Be sure to order a good supply.

**SPECIAL HOME PLANTING OFFER**

12 Sunrise 12 Indian 24 Best Plants $3.95

**A Distinctive Pair -- Outstanding**

**MARCY THE BIGGEST YET**

Its long, conically shaped, moderately firm and thick fleshed fruit makes Marcy a highly desirable berry as well as an excellent shipper. The plants are tall and exceptionally hardy with stalky canes that hold fruit well. Berries produced in test lots show Marcy to be the largest of all leading varieties.

**TAYLOR Favorite of the Future**

Its rigid tree-like canes hold its bright red, new oblong shaped, giant sized berries well off the ground. For luscious flavor and crumble-free fruit, Taylor is all that you could ask for. Taylor is dependable and always comes through with heavier yields and greater profits.

**SPECIAL OFFER**

12 Marcy 12 Taylor 24 Select Plants for $3.95
TOWNSEND'S Select Strain

BLACKBERRIES

Always A Dependable Money-Maker On Any Market

ALL GROWN FROM ROOT CUTTINGS

If you want to increase your profits, just bear this fact in mind. One acre of blackberries will average 800 to 2000 quarts — and prices on this fruit are always at a premium. Townsend's Select Strain blackberry plants are of the same high standards that have made our strawberry plants famous. They are grown from strong root cuttings, because we know that this method of propagating is far superior to sucker plants. They make a much more fibrous rooted plant and grow off much quicker after setting. One planting lasts for several years, and the first crop generally more than pays for the entire investment. After the first crop, blackberry plants grow upright, standing in bunches and often attaining heights in excess of 6 feet. Despite the fact that we sell hundreds of thousands of blackberry plants to commercial growers every year, we sincerely believe that every home garden should contain several of these easily grown plants. Not only will they furnish plenty of big, tasty berries for making luscious cobblers, wines, jams and jellies, but will also enable you to sell off plenty of left-overs.

Bigger and Better Results With Townsend's Select Strain

Eldorado

IT LEADS THE FIELD

Famous for being the most widely planted of all commercial blackberries, Eldorado's unexcelled productivity cannot be beaten. Its fragrant, jet black, large-sized, Practically coreless berry is in demand wherever and whenever blackberries are marketed. Eldorado does exceptionally well even under extreme cold weather, and you can depend upon this hardy variety for satisfaction far beyond your greatest expectations. Eldorado is a mid-season to late variety and is superb for making pies, jams, jellies and wines.

New Alfred

SUCCEEDS ALMOST EVERYWHERE

Known to have successfully withstood 35 degrees below zero, the New Alfred's hardiness cannot be adequately evaluated. This rugged producer of large, sweet, coreless berries ripens a few days earlier than Eldorado. Alfred's northern Michigan origination has made it adaptable to all sections. Growers in all of the northwestern states as well as in Ohio, West Virginia, Indiana, Illinois, New York and Pennsylvania are loud in their praises as of the merits of this new variety. We recommend the New Alfred highly and in our estimation, for a fine mid-season variety, there is none better.

Plants Arrive in Splendid Condition

Cottageville, West Va.

Dear Sir:

Blackberry and strawberry plants arrived in splendid condition, and we are very much pleased with them.

Carl Gerlach

See Page 33 for Prices on Bearing Age Blackberries

Early Harvest

The Earliest Of All Blackberries

This variety is unquestionably the most productive of all the early ripening blackberries. Its growth is superlatively abundant and vigorous, and the canes are very hardy. It fruits a medium large but very firm berry that is excellently suited for shipping purposes. For a high quality early blackberry — plant Early Harvest.

Blowers

Always A Profitable Investment

Its vigorous and hardy vine, and its heavy fruiting qualities have established for Blowers the reputation of being one of the leading commercial varieties on the market. Its berries are borne in large clusters and are sweet and melting to the taste. Blowers is a heavy producer — especially in the northern states. Get in on Blowers profits this season. Order early.
Justly reputed to be the largest and finest berry ever produced, the Boysenberry is a grower's answer to certain profits. This newest addition to the berry family came as a result of crossing blackberries, raspberries and loganberries. Possessing the best attributes of its parents, the Boysenberry is a veritable giant — often growing more than 2 inches in length, and 1 inch in diameter. Its flavor is a subtle and absolutely delicious blending of its parent berries, and the tremendous yields, plus its excellent crop, spell success for the Boysenberry in a big way. And, tremendously important also is the fact that — it comes into bearing the next year after planting and one planting lasts for many years.

Commercial growers share with home gardeners their enthusiasm and delight in the abundant growth and remarkable quality of Boysenberries. The fruiting season generally lasts for as long as two months and it is not unusual to pick 20 baskets of berries to the plant the second year after planting. We strongly recommend that you give this extraordinary berry a trial. You're bound to be amazed at the results.

By Far the Largest and Heaviest Producing Berry of the Blackberry or Dewberry Family. Berries Often Exceed 2 Inches in Length. 2200 Pints Picked From 100 Two-Year-Old Plants Average — 35 Berries Per Quart Box! Gross Returns — $1760.00 From One Acre!

DEWBERRIES

MARKET prices in recent years are reasons why every commercial grower should plant Dewberries. Townsend's Select Strain Dewberry stock is in fine shape this year and just waiting to turn themselves into ready profits for thousands of market growers and home gardeners. The Dewberry is a trailing blackberry and a little less hardy. However, Dewberries ripen much earlier than blackberries, are a much larger fruit, and they have a finer flavor. It has been successfully grown on a large scale in the central and southern states, however since the advent of the Youngberry, the Boysenberry and the Nectarberry varieties, the planting section of the Dewberry has been advanced some two hundred miles north. Growers have been reporting excellent results as far north as Rhode Island and western New York. Due to the very fine texture of Dewberries, long hauls should be avoided and they should be placed on the market soon after picking.

YOUNGBERRY

A new trailing variety of the Dewberry family. Combining all of the best features of the Raspberry, Blackberry and Dewberry, this new variety has a rich, spicy flavor that is delightful to the taste, and unsurpassed or equalled in productivity. It's large, uniform, and practically seedless fruit place it among the highest price drawing fruit on any market. Excellent for jellies, canning, or eating fresh, Youngberry is tops for either commercial growers or home gardeners.

NEW THORNLESS BOYSENBERRY

This all-together luscious, new, and thornless berry is the answer to pickers who are troubled with thorns when picking dewberries. Containing much of the same advantageous characteristics of the Boysenberry, its parent, this grand and newest addition to the berry family is certainly a worthwhile variety for any commercial or home grower to plant.

GRAPE VINES

Bigger and Better than Ever Before!

4 "CHOICE" NEW VARIETIES

The best by far of the new — AND — approved by Townsend’s for superior yields, quality fruit, and early fruiting habits. All of recent introduction.

COCO (A Better Red) This prolific new, amber red is considered the best and hardwood of its kind ever produced. Its bunches are large, and the flavor of its fruit can be compared with the finest for rich, sweet qualities. Holds fruit well after ripening.

CHAMPAIGNE (Richest Amber Yet) Being all that its name implies, this new variety is unsurpassed for rich, very fine flavor. It produces large, beautifully colored amber grapes in tight, compact bunches. This variety is destined to become an all around favorite. Its vigorously growing, strong vines fruit at an early age. Champagne is one of the best varieties on our list.

FREDONIA (A Fancy Black) A fancy quality blue-black, and one of the earlier to ripen, Fredonia’s juicy, but solid fruit grow abundantly on hardy vines and its large, compact bunches are real money-makers for any commercial grower.

PORTLAND (White) This new variety ripens earlier than any other known grape. Portland’s call to fame lies in the taste of its grapes. Its large, beautiful, yellow colored fruit contain so much sugar that they can be eaten long before they are fully ripe.

Townsend’s Select Standard Varieties

The Famous CONCORD (Black) This famous, ever dependable, sure cropper variety is the standard by which all other varieties are judged. Regardless of whatever other varieties are grown, no vineyard or arbor can really be called complete without a liberal planting of Concord. For almost a hundred years this old, reliable variety has been a constant money-maker, and it is still referred to as the "King" of all grapes. Its wonderful adaptability to all soils and its ready flourishing under varying climatic conditions go a long way in accounting for Concord’s long-time popularity. Concord ripens mid-season to late and is unsurpassed for vigorous growing habits and productivity. For commercial growers, Townsend’s winter-hardened Concord stands supreme.

The Mellow CATAWBA (Red) This variety keeps better than other grapes now being cultivated. A late ripening, very sweet, copper red fruit, Catawba is used extensively for wine making.

MOORE’S EARLY Money-making White Ripening two weeks earlier than Concord, this seedling of Concord is an extra heavy producer of large excellent quality black fruit. It is planted extensively by commercial growers.

The Magnificent NIAGARA (White) Receiving most of its characteristics from its parent Concord, this magnificently flavored, white grape is a true off-spring of the "King". Its impressing, compact clusters ripen with Concord.

The Heavily Fruiting WORDEN (Black) This ever popular, thin skinned variety is famous for tremendous yields, and is one of the earliest ripening of all varieties. Excellently flavored, Worden is a hardy growing, bluish-black variety.

Fruits The First Season

By the time we have transplanted Bearing-age plants into our nursery rows, we have grown them a full year under the most idealistic growing conditions possible. A special twenty acre irrigation system nurtures them from original setting until transplanting, and in order to guarantee our customers well balanced, healthy plants, plenty of humus is added to the soil before setting. Cultivation and pruning is carefully carried out throughout the entire season, and a carefully supervised method of tying, bundling, and wrapping (the full length of the cane) is also performed in order to give a maximum amount of protection to the plants so that the customer will receive them in perfect condition. Bearing-age plants will more than pay for the slight difference in cost.

SPECIAL ANNOUNCEMENT TO ALL HOME GARDENERS

Quick fruiting results, the first season set, make Bearing-Age plants specifically adapted for home growers. And, too, Raspberry, Blackberry and Dewberry plants will produce excellent crops every year from three to five years from original planting, thereby providing your table with plenty of fresh, delicious berries directly from your own garden at an amazingly low cost. Bearing-age grapes bear from eight to twelve years. Be sure and include some of these Bearing-age plants in your next order, and to make sure your garden is complete, don’t forget our Fall-bearing varieties in order to have fruit from early Spring clear through to November.

Townsend’s Improved Strains

**APPLES**

For Commercial and Home Planting

**THE BEST OBTAINABLE!** Here’s a really wonderful assortment of choice standard varieties that for many reasons revolutionize apple growing. Getting right down to facts, Townsend’s select Heavy Fruiting varieties have quality plus and furnish a succession of high grade fruit from August through Fall, Winter and the following Spring. They are sturdy and hardy and have been known to thrive and produce where others fail. For keeping or cooking, Townsend’s trees will give you delicious apples that will be the envy of all your neighbors.

Plant a full assortment of Townsend’s select apples and experience year round eating pleasure. We currently have a splendid stock of fine quality two-year grown trees and we are sure that they will please you. We advise having apple trees come by express or freight.

- **YELLOW TRANSPARENT** Deliciously mild and juicy. Early, and easily the best yellow apple.
- **LODI** Reports indicate that there is a big future in store for this new, extra large summer apple. Lodi bears very young and ripens about the same time as Transparent, however the fruit is much larger and more firm. Early bearing.
- **EARLY McINTOSH** Resembling McIntosh in appearance, but bearing earlier, this firm, appetizing, handsome Red is tops for flavor.
- **IMP. ALL RED JONATHAN** For growers that want deeper colored, richer looking Reds, this variety is definitely the answer. Bears a medium sized apple of superb quality—appealingly attractive, and an excellent keeper.
- **IMP. ALL RED McINTOSH** A definite improvement on already famous McIntosh apples. The color is a solid red and commences to color weeks earlier. Highly recommended because of excellent shipping and storage qualities.
- **GRIMES GOLDEN** Known and acknowledged as the very best home orchard apple, Grimes Golden needs no introduction. Its sub-acid delicious flavoring has been a source of eating delight to those who eat apples raw, and it is unsurpassed for cooking. This variety is golden yellow in color, a Fall apple, and highly recommended by Townsend’s.

---

**CRAB APPLES**

**DOLGO** A new and unusual crab apple. Its fruit is strikingly beautiful, fiery red, and borne in great profusion. The tree is a hardy and vigorous grower. The fruit is of medium size and excellent for rich, ruby red jellies.

**HYSLOP** Tremendously prolific. Fruits large, shapely, brilliantly colored purplish-red apples that are excellent for jellies.
HALLE HAVEN
A delicious flavored yellow freestone peach of attractive appearance. Very hardy and frost resistant. Ripens two weeks earlier than Elberta. Fruits at an early age. One of the best peaches on our list for commercial or home planting.

Frederick Co., Va.

Gentlemen:

You may like to know that the peach trees purchased from your nurseries just two years ago, had a nice crop of peaches this year. Thanks for supplying us with early bearing trees, they are wonderful.

Wm. H. Harshmeyer
(Note: Our trees are widely known for quick-bearing due to bud selection from bearing trees.)

RED HAVEN (1) This new and most promising early ripening freestone that ripens just before the old favorite Golden Jubilee, bears heavy crops of almost fuzzless fruit. A superbly hardy variety, Red Haven has successfully weathered temperatures as low as 15 degrees below zero, and still borne full crops. It is rich, yellow skin that is almost entirely covered by a dark, red blush, and its uniformity of size tend to cause this variety to sell on sight.

GOLDEN JUBILEE (2) A sure cropper that resists excessive cold and comes in a winner in spite of severe winters and heavy frosts. Golden Jubilee is outstanding for hardiness, and is a great peach for both commercial and home growers. Its fruit ripens about four to five weeks before Elberta. Fine flavor, yellow freestone, fine texture and attractive coloring are some of the high points of this distinguished peach.

HALLE HAVEN (3) Steadily and consistently gaining in popularity because of its admirable coloring, luscious and juicy taste, excellent shipping qualities and extreme hardiness in bud, this variety is recognized in almost every peach growing locale as THE BEST PEACH FOR "QUICK FREEZING." This marvelous new peach is a cross between the famous South Haven and J. H. Hale, and is a true aristocrat in the peach world. Succulent yellow flesh, and a freestone.

EARLY ELBERTA (4) When true quality is desired, PLANT TOWNSEND'S ORIGINAL STRAIN OF EARLY ELBERTA (unusual size too). Ripening about 2 to 8 days before regular Elberta, this splendid variety bears consistently. Its yellow fleshed, large sized fruit is made more attractive by its fine skin that bears a soft blush of red. You can't go wrong with this Townsend original. Freestone.

BELLE OF GEORGIA (5) Home canners prefer the "Belle". Known as the most popular of all peaches, this variety ripens in mid-season and is a consistent market favorite. Tree vigorous and highly productive. The best of all white peaches.

ELBERTA (6) America's favorite peach—and for good reasons, too. This internationally known variety is unquestionably the greatest peach ever introduced. Its giant sized, freestone fruit is famed for its wonderful flavoring. Constant remark—"... without a doubt the best I have ever eaten."

BRACKETT (7) Grand for canning and a fine market peach. Excellent quality and a freestone. This variety follows Elberta by about five days.

LIZZIE (8) Late, about 12 to 16 days after Elberta, and a distinctive freestone. In size it is large or larger than Elberta. When a late peach is wanted, Lizzie more than fills the bill.

Grow Strawberries As Intercrop With Peaches

Special Offer "C"

100 Premier - 100 Townking Strawberry Plants
200 plants only $3.95

ALL FOR $9.45
ALMOST a generation ago, our country was subjected to a very serious tree disease. This national scourge destroyed most of the chestnut bearing trees throughout the Nation.

It gives Townsend Nurseries great pleasure to announce that once again it is possible to harvest your own crop of chestnuts in the Fall. By planting Townsend's Blight-Resistant chestnut trees, you can know the thrill of gathering these meaty nuts—lost these many years—the second year after the trees are planted. Best results for pollinization of blight-resistant trees are obtained with 3 trees, although it is possible at times with 2 trees.

PRICES
1 to 5 trees - $1.95 each
6 to 10 trees - $1.75 each
11 or more trees $1.50 each

Propagated from parent trees which average 38 to 42 nuts per pound (Natural average 75 to 90)

Something New— for the Younger Generation

- The sight of these trees once again flourishing cannot fail but to evoke many memories from the older element, whereas they will be something entirely new for the younger people. Of course the pleasure of roaming the woods at Autumn and gathering these tasty nuts is probably gone forever, but this fact does not prevent either commercial or home growers from realizing their own crops.

ANY WELL DRAINED SOIL WILL DO! Townsend's thoroughly Blight-Resistant chestnut trees are disease free—and easy to grow. These trees require practically no care after once being set, and thrive vigorously in any well drained soil. No spraying is necessary.

Select Bush Cherries

LARGE, glistening black, sweet, hybrid Bush Cherries. Good to eat fresh or canned. They bear in cold climates, where standard Cherries fail. Borne in great quantities on low-growing bushes. The white blooms in spring make them very ornamental. Leaves color red in autumn. Trim to desired shape and size. Set bushes 3 feet apart. Thrive in any good garden soil, or in the shrub border.

PRICE: 2-yr., field-grown (QUICK-BEARING BUSHES):

69¢ each 3 for $1.79
FRUIT GROWERS!

It's easy to grow perfect fruit if you know how. We would like to tell you how it's done and help you solve your fruit problems.

Here are a few things we told our readers in recent issues: Identifying Insect Injuries, The Insecticide DDT for Fruit Insect Control, Identifying Disease Injuries, How to Handle a Picking Crew, How Much Cold Can Fruit Take and How to Identify Varieties.

Do you know what varieties are best to plant? Are you planning to build a cold storage? Are you looking for something new in fruit packages? These questions and many others will be answered in future issues of America's leading fruit magazine, the AMERICAN FRUIT GROWER.

No place can you get so much for so little... 36 profusely illustrated issues packed full of timely information for every fruit grower, and for only $1.00.

Mail the coupon today with your remittance (at our risk) direct to the AMERICAN FRUIT GROWER, 1370 Ontario St., Cleveland 13, Ohio.

1-9 $2.20 each
10-49 $1.75 each
Above Prices for Sweet Cherries — Sour Cherries $.45 per Tree

SWEET CHERRIES

BLACK TARTARIAN A remarkably vigorous and an erect grower. One of the most popular varieties in all parts of the country because of its tremendously abundant yield. Fruit extra large, very juicy and tender, and rich purplish black in color.

GOVERNOR WOOD An old and ever dependable favorite. Tree vigorous and productive, fruiting heart shaped yellow cherries with attractive red mottling. Ripens middle of June.

NAPOLEON Light, amber fruit over-toned with a rich red. Excellent for canning purposes. Fruits enormous crops. Early July.

SOUR CHERRIES

EARLY RICHMOND Probably the most valuable and popular cherry on the market today—unsurpassed for cooking purposes. This most hardy of all varieties yields amazingly abundant crops and remains uninjured thru the coldest winters. Ripens in June. Fruit is round, thin skinned, rather rough but easily separated from the pulp, and sour. Earliest fruiting.

ENGLISH MORELLO Extremely hardy for cold latitudes, and fruits in late July and early August. Small, dwarf size trees fruit very heavy. Fruit nearly black, acid, and good size. The only really late cherry.

MONTMORENCY (Large) This variety has the cleanest and best growing tree of them all; less subject to disease, and the best bearer of the highest grade sour cherry of any other variety. Tree bears young within 2 years after planting, and fruit is extra large and bright red.

WRITE FOR SPECIAL PRICES ON LARGER QUANTITIES THAN QUOTED ABOVE

Townsend's plants are used exclusively by the largest strawberry associations in the country. Any association, group of growers who wish to post their orders, or any large grower interested in purchasing a variety in larger quantities than quoted above, should write us for our special price. When writing, just give Variety or Varieties wanted and approximately amount needed. You will be under no obligation to buy. It is par of Townsend's Service which we are rendering our customers, and which has helped us to build our business to the present standing as The World's Largest Growers—Shippers of Strawberry Plants.

ORDERS CAN BE BOOKED IN ADVANCE OF SHIPPING DATE. You can send along your order on receipt of this catalogue. A 25% deposit will reserve stock for you. We will dig and ship whenever we receive your shipping instructions. Thousands of our customers annually take advantage of this service. On long lists of varieties it insures them of getting varieties wanted.
Dear Friend:

Your valuable inquiry asking for our new Berry Book was received this morning, and I want to thank you for the opportunity given us to serve you. This Free Berry Book is going forward in today's mail and I hope it reaches you promptly.

The writer and his associates have spent considerable time checking the varieties of fruits that are offered in this book, and we realize the importance of listing only varieties of outstanding merit that will give our customers the best yields when grown over a wide range of soils and climates.

From the thousands of reports received from our customers annually and with the kind help of various State agricultural colleges, Government agricultural officials and our own extensive trial grounds, we are positive that the varieties of berry plants and other items offered in this new book provide the most complete assortment of the truly outstanding varieties on the market today, and will give you the best yields when grown under ordinary average conditions. You can order any variety in our book with full confidence that they will be satisfactory.

While we have tried to give you as accurate description and as complete growing information as space in our catalogue will allow, I want you to feel free to write me at any time that you may have problems in fruit growing. I will do my best to help you.

I want you to know that I appreciate receiving your inquiry and will be just as pleased to have further opportunities of serving you whenever the occasion arises.

With kindest regards, I am

Sincerely yours,

TOWNSEND NURSERIES

L. Sherman Townsend, Lgr.

We ask for your order "fully confident" that we can please you.

### These figures are average—the rate varies according to variety. On all orders of 100 or more plants, the rate is cheaper by Express after the second zone.

### On all orders of 100 plants or more of Cane Stock items listed above, the rate is cheaper by Express after the second zone.
Giant Blueberries

These Giant Blueberries—Townsend’s Best—lead all the rest in profit yields and delicious eating properties. Plant this season and be assured of getting a large yield of choice, luscious berries by next Spring. These select plants bear for many seasons—bigger and better yields each time—thus your first cost covers everything.

The large, delicious berries can be eaten right off the bush, and are ideal for either canning or quick freezing. Plant two or more varieties for cross-pollination. If you plant for commercial reasons, the fact that these berries will bring up to, and often far beyond, 75c per quart will undoubtedly interest you. Blueberries demand and get the highest prices on the fruit market.

SPECIAL OFFER
Just the right size blueberry garden for the average family. These varieties have been selected especially for their adaptability to any section of the country. We will ship at your proper planting time—order now!
